

ABINGTON EYE CARE
A MEMBER OF

During an annual eye exam, our doctors utilizes the **optomap® ultra-widefield retinal exam** to monitor for complications including macular degeneration, diabetic retinopathy, glaucoma, and retinal holes or detachments. *These problems can develop without warning and sometimes with no signs or symptoms.*

This state-of-the-art technology allows your doctor to see small details that can assist with detecting systemic problems unrelated to the eye such as hypertension, diabetes, cancer/tumors, auto-immune disorders, and others.

The optomap® Retinal Exam:

- ✓ Is as fast as taking a picture.
- ✓ **DOES NOT REQUIRE DILATING DROPS. You may not need to be dilated today, potentially eliminating a 30-minute wait and avoiding side effects such as blurry vision and light sensitivity.**
- ✓ Will be saved in your file enabling your doctor to make important comparisons during your annual eye exam.

The cost for the optomap® Retinal Exam is \$39.

____ I understand that the optomap® Retinal Exam will be performed today and do not have any questions.
